

# *LONG DISTANCE*

*Let Tech Valley Communications help you maximize the efficiency of communicating with the rest of the world, while minimizing your total cost*

**Tech Valley Communications offers a full range of long distance services at the lowest possible rates. From domestic and international long distance, toll-free services, and convenient account code features to enhanced/customized calling cards --- let Tech Valley Communications connect you to the world!**

## **Simplified Pricing**

*Regardless of the time of day, you always receive low cost, flat rate pricing.*

*If your business does a large volume of long distance calling, Tech Valley Communications may be able to reduce your rates significantly by installing a dedicated T-1 circuit.*

## **Account Codes**

*You can manage your long distance expenses with Tech Valley Communications' Account Code feature. Two, three, or four digit account codes (verified or unverified) are available to you at no additional charge. Save money by tracking your company's long distance calls with Tech Valley Communications' Free Account Code Feature!*

## **Toll-free Services**

*Toll free numbers are essential in providing your customers with a convenient means of reaching you or your company. If you already have a toll-free number, or you need Tech Valley Communications to provide you with a new number, we make it simple and affordable for your customers to conveniently reach you.*

## **Calling Cards**

*Tech Valley Communications' easy to use Calling Cards offer all of the features and functions you need at fantastic low rates! Our state-of-the-art toll fraud detection also provides you with the protection you need on your calling card. Call Tech Valley Communications Customer Service for additional information.*
